

Who Wants To Win A \$25 Gift Card?

You can be the Grand Prize Winner of this month's Trivia Challenge Quiz! Just be the first person to correctly answer this month's trivia question and receive a \$25 gift card to Amazon. Ready? Email us right now with your answer! trivia@kamind.com

What is the origin of the word "spam" in the context of email spam?

- a) A Monty Python skit from the 70s
- b) Poor developers sick of eating the same meal
- c) It's an acronym for "Spontaneously Persistent Advertising Message"
- d) SPAM meat was the first product to be "Spammed" via email.

Last month's Trivia winner was Ted Hanna of Tigard.

Shiny New Gadget of the Month: Your Car Companion: FIXD

When you're driving, there's one thing you hope to never see: the Check Engine light. This symbol often means that something is wrong, but it's rarely clear what that is. Well, here's a little help: FIXD!

FIXD is a small device that connects to your car's onboard diagnostic (OBD) port. Every car built after 1996 has this port - it's what mechanics use to diagnose vehicle issues when a dashboard light comes on. You can use it too, so you won't have to rely on a mechanic to tell you what's "wrong" with your car. FIXD wirelessly connects to your smartphone and tells you directly. Then, you can decide what to do!

Say goodbye to the mysterious Check Engine light and say hello to FIXD. Learn more at bit.ly/3aISXwy.

TECHNOLOGY TIMES INSIDER TIPS TO MAKE YOUR BUSINESS RUN FASTER, EASIER AND MORE PROFITABLY

These Technologies Hold The Key To Growing Your Business

After a roller coaster of a ride in 2020 and into 2021, businesses just like yours are looking to the future. Their eyes aren't just on recovery. Many businesses are eager to make up for lost time, and they want to bring new customers into the fold.

There are countless growth strategies out there, but one area offers a lot of options you can dial into your specific business needs: technology. Under the umbrella of tech, you have plenty to choose from. It really comes down to finding the right solutions that fit the current or future needs of your business.

This month, we'll dive into two ways you can utilize various technologies to grow your business in the second half of 2021 and in the years to come. Let's get started.

Using Automation

Many businesses have yet to crack the code on automation. They aren't sure how to implement it and make the most of it. And that's okay. Automation comes with a few hurdles,

like just getting started for one. It's an investment of time and money. However, once you get started, it does the rest.

A majority of daily business activities can be automated. One increasingly popular form of automation is artificial intelligence (AI), often used by chatbots. In the past, chatbots were useless. From the user standpoint, they never worked as expected. But those days are over; thanks to major strides in AI technology, chatbots are automation kings.

Chatbots are highly customizable. You can use them as the first "person" a customer or potential customer sees when they visit your website. From there, a chatbot can ask questions and mimic a real person. But here's where the automation really comes into play: if a potential customer has a specific request or question, the chatbot can instantly direct them to the person within your company who can help. It saves a lot of time.

WHAT'S NEW inside KAMIND IT

Here's wishing you a happy Independence Day celebration!

We have a guest speaker for our July webinar. If you want to steer your company with focus and discipline through any crisis, you need to learn the time-tested business secrets of managing through the chaos. This month we are offering LIVE training with a scaling-up expert, Chuck Kocher, who will share four keys to accelerating growth through 2021 and beyond. The webinar will be held on July 27th at 10 am PDT. More details can be found at: <https://www.kamind.com/scaling-up-webinar/>

Microsoft granted KAMIND a new security award: "Advanced Specialization in Identity and Access Management" to go alongside our earlier award of "Advanced Specialization in Threat Protection". Very few Microsoft partners have earned advanced specializations so we feel very honored.

Automation is also useful when it comes to collecting data. Now, you can rely on numerous apps to collect different types of data and have it all sent to one place. For instance, you should have forms on your website where people can input data, such as their name and e-mail (and other similar data you may be interested in). You lock free content (such as special reports, books, videos, demos, offers, etc.) behind a “data wall.” Once a potential customer gives you what you want, they get access and you have a lead.

Investing In IT Security

Many businesses went through huge changes last year. One common change was the shift to remote or hybrid work models. In the process, these businesses had to figure out a lot of things on the fly, from how to get their employees up and running to making sure their data was secure.

Unfortunately, many businesses, particularly small and medium-size businesses, struggled to balance getting their employees up and running and staying secure, due to a lack of resources, support or know-how. They ended up having to focus on one or the other – data security often got left in the dust. And in the mix of it all, growth completely fell off their radar.

We’re going into Q3 2021, but many businesses still lag behind when it comes to their IT needs. Not investing in network security, and an overall IT security strategy, has the potential to hold your business back and prevent the growth you’re looking for. Not only is your data at risk from both internal (hardware failure, data loss, etc.) and external (data breaches, cybercriminals, etc.), but there are also other issues to be aware of.

Here are a few questions to consider:

- Do your employees have strong endpoint security? (Are their devices and network connections secure?)
- Are they trained in IT security protocols? (Do you have protocols in place?)
- Are your network and IT needs scalable? (Do they allow for growth or are they static?)

These questions are a starting point. If you aren’t happy with the answers, it’s time to fill the gaps and give your business the advantage it needs for the future.

Getting Started

If technology still eludes you, you want to jump into the cloud or automate parts of your business, or you need to boost your data security, your best next step is to partner with a managed services provider (MSP) or a firm that specializes in IT solutions. You never have to do any of these things on your own – especially if you have questions or aren’t sure how to get started. This is the kind of partnership that can put your business on the path to hitting your growth goals and set you up for tech success!

Free Cyber Security Audit Will Reveal Where Your Computer Network Is Exposed And How To Protect Your Company Now

At no cost or obligation, our highly skilled team of IT pros will conduct a comprehensive cyber security audit to uncover loopholes in your company’s IT security.

After the audit is done, we’ll prepare a customized “Report Of Findings” that will reveal specific vulnerabilities and provide a Prioritized Action Plan for getting these security problems addressed fast. This report and action plan should be a real eye-opener for you, since almost all of the businesses we’ve done this for discover they are completely exposed to various threats in a number of areas.

To get started and claim your free assessment now call our office at 503-726-5933.

Mastering Authentic Leadership

When I think of the old definition of leadership, I think of corporate CEOs pretending they don’t have weaknesses. Instead of using more productive leadership habits, they’re focused on fixing, managing and controlling perceptions to get what they want (the same way a drug addict fixes, manages and controls perception to get the next hit.

Great leaders in the future will lead in a fundamentally different way. The only people who have been systematically trained in the new, authentic model of leadership are recovering drug addicts. This is probably not the first time you’ve heard about leadership, and you may be familiar with my story and stories like it. And we have all been impacted by addiction in one way or another. As a recovering addict, I’ve been there. But I’ve also been in leadership positions.

We have a saying in recovery: “A head full of recovery will screw up your using.” Once you know something, you can’t unknow it. It’s all about “screwing up” your perception of leadership. But first you have to understand your addiction – that thing you do over and over again despite the negative consequences.

There are three behaviors addicts exhibit:

1. Saying yes to something you should say no to (getting high)
2. Hiding your weakness (“I never talked about how much I was struggling”)
3. Avoiding difficult conversations (such as interventions and getting clean, thus preventing solutions)

As a professional, you waste 500 hours every year doing these three things. It’s possible you are an addict and all you have to do is accept the possibility that you are an addict. When you realize this, you can begin to say no instead of yes. When you do, things will start to change – that isn’t to say it’s easy.

You can tell a leader to just stop over- committing, stop being inauthentic or to stop working at 5:00 p.m., but these things are scary – and we aren’t addressing the real problem: addiction. Leaders are addicted to their “mask” – that thing they hide behind as they exhibit those behaviors.

What can you do about this? I had a 12-step process to address my addiction, but it boiled down to three things:

1. Practice rigorous authenticity.
2. Surrender the outcome.
3. Do uncomfortable work.

You learn to lead in a fundamentally different way. Addicts have exclusive access to these kinds of principles. So, I’m sharing these same ideas with you, to help you know you can get clean and change the

way you lead.

P.S. Be sure to check out the accompanying Petra Coach webinar at [PetraCoach.com/ mastering-authentic-leadership-with- michael-brody-waite](https://PetraCoach.com/mastering-authentic-leadership-with-michael-brody-waite).

Michael Brody-Waite is a recovered drug addict who has since become a three-time CEO and TEDx speaker (with over 2.2 million views). He’s held a leadership role at a Fortune 50 company, he’s the founder of an Inc. 500 company, he’s led a nonprofit and he’s the author of Great Leaders Lead Like Drug Addicts: Lead Like Your Life Depends On It.

“Go ahead. Click on ‘I Am Not A Robot.’ I dare you.”
