

## Who Wants To Win A \$25 Gift Card?

The Grand Prize Winner of last month's Trivia Challenge Quiz is Blake Adams! He was the first person to correctly answer our quiz question from last month. The answer was: B) Books.

You can be the Grand Prize Winner of this month's Trivia Challenge Quiz! Just send in your answer to this month's trivia question and - if correct - you will be entered into our monthly drawing to receive a \$25 Amazon gift card. Ready? Email us right now with your answer! [trivia@kamind.com](mailto:trivia@kamind.com)

What popular social networking site was sold to News Corp. for \$580 million in 2005?

- a) Twitter
- b) MySpace
- c) Facebook
- d) Snapchat

## Authorities Seize Largest Stolen-Login Marketplace Site On The Dark Web

Earlier this year, the Department of Justice announced that they, along with other international authorities, had seized Slilpp, the largest site for stolen login credentials on the Dark Web. The site had over 80 million user credentials lifted from 1,400 service providers.

Authorities from four different countries all helped the FBI seize servers that hosted Slilpp. They also arrested and/or charged 12 people involved with operating the site.

Eighty million user credentials from 1,400 sites is a lot of sensitive information. That said, though, the Department of Justice still hasn't ascertained the full impact of the illegal activity on Slilpp. In the U.S., activity on the site led to almost \$200 million in losses - and that's just a tiny fraction of the total activity.

The fight isn't over, but this case is a big win against illegal login sale marketplaces. The Department of Justice hopes for more seizures like this one in the future.

INSIDER TIPS TO MAKE YOUR BUSINESS RUN FASTER, EASIER AND MORE PROFITABLY

## How Co-Managed IT Could Save Your Company From Financial Disaster

When you consider the investments in your business that you can make as a CEO, you probably think to yourself, "Which investments will give my company the best ROI?" With that in mind, would you think of making a significant investment in bolstering your IT department?

Many CEOs are understandably hesitant to throw a lot of money into their IT department because the ROI is more difficult to estimate. That said, though, consistently updating your company's IT services is becoming increasingly crucial to the continued success, and indeed safety, of your company. Ransomware and other cyber-attacks that steal company data are becoming more frequent and more costly, while IT departments continually get the short end of the budgetary stick.

While that all undoubtedly sounds horrible, you might be wondering just what you can do about it. After all, you only have so much money you can invest back into

your company's IT department, and it might not be sufficient for keeping your IT staff from getting burned out, disgruntled or making costly mistakes - even when they're performing their responsibilities to the best of their abilities.

What if there were a way that you could have access to the most up-to-date IT knowledge and software while also not having to shell out the funds necessary to update your systems and hire more knowledgeable employees? Well, that's where co-managed IT can be your company's life preserver.

Co-managed IT is a flexible system for keeping data for your company, employees and clients safe from cyber-attacks as well as assisting in your daily operations where needed. Think of it as "filling in the gaps" that your current IT department (try as they might) struggle to fill.

For instance, say your current IT department is great at taking care of the day-to-day fires that inevitably

## WHAT'S NEW inside KAMIND IT

Time flies... it's hard to believe that it's back to school time!

With the dog days of summer now firmly behind us, we are looking forward to tackling new projects with gusto. To help us do this, we are fortunate enough to have a new team member on board who is an experienced Program Manager. Dawn is a breathe of fresh air and is helping us all be more productive already.

KAMIND is honored to be chosen to be on the list of INC 5000 companies for the third year in a row. We couldn't have achieved this without the great team we have in place.

As we continue to grow, we are looking for new members to join our team. Please let us know of anyone who might be interested in a position with a fast growing cloud-based company.

Assisting Organizations to Utilize Technology to Drive Innovation

Continued from Page 1

come up in a normal workday, but they struggle to get to the “important but not urgent” task of updating your company’s cyber security and creating data backups. Maybe it’s the other way around, where your IT department is very focused on security, but they struggle to find time to assist employees with password resets and buggy programs. Maybe neither of these cases describes your IT department, but they still need better access to the tools and software that would allow them to reach their full potential in protecting the company’s sensitive information. Or maybe your company is going through a period of rapid expansion, and you just don’t have time to build the kind of IT infrastructure that would best serve your needs.

Regardless of what your IT department’s current needs are, co-managed IT is the solution. We’re here to do the tasks and provide the tools that your current IT department just can’t provide. Make no mistake, however: our intent is not to replace your current IT leader or team. In fact, we rely on the expertise that your IT department has about your systems. That’s what makes up the “co” in “co-managed IT.”

In order for co-managed IT to work, your company’s IT department will need to see us as an ally in doing their job, not as an adversary. At the same time, they’ll also need to be open to new ways of doing things. The world of cyber security is constantly changing, and if your IT department is set in their ways and unwilling to budge, your company will be left with an antiquated system, chock-full of valuable data that hackers and cybercriminals can easily exploit.

Finally, however, in order for co-managed IT to work, your company still must be willing to invest in its IT department. We know that the ROI might not be as clear as it is for some other investments, but trust us, the consequences of not having up-to-date IT services if (or when) hackers steal your sensitive data could financially devastate your company – or even end it altogether.

So, with that in mind, we hope you’ll consider the benefits of co-managed IT and how it can make your company safe from cyber-attacks and bring you peace of mind.

## Announcing...

In case you missed it in the last newsletter, KAMIND has been chosen as one of the few Microsoft partners that is authorized to sell Microsoft GCC High licenses which are needed for companies doing business with the Federal Government. If you ever need any of these specialized licenses, we can be your one-stop shop for all your Microsoft licensing needs. Just call us at 503-726-5933 and ask for Mike or Brendan.

## Free Report Download: Do you Know What to do if and When a Security Incident Happens?

It is really important you be prepared for the eventuality that your company could get breached. We all hope that never happens to you but if it does, it is critical that you be prepared at that time. We know that effective incident response is a complex undertaking that requires substantial planning and resources. This guide is designed to assist in establishing computer security incident response plans and capabilities, enabling you to handle incidents efficiently and effectively.

It is extremely important that you get and read this special report before you get blind-sided. This report discusses in simple, nontechnical terms what to do before an incident and how to respond during an attach. Handy checklists are also supplied to make sure you don’t leave any steps out.

## How To Succeed In Business And Life In Just 8 Hours Per Week

Do you want to know my secret to success – how I’m able to live the way I do after growing up in a dysfunctional family, lasting half a semester in college and possessing no special skills, talents or intelligence? Well, I do two things that most people don’t do: I study and I plan.

I pull these two levers once every day (and twice on Sunday), and that’s what has led to three decades of success. You can follow my example. Like all fundamentals of success, the daily disciplines of studying and planning are easy to understand, but hard to maintain in practice. Most people don’t have discipline, and, therefore, they do not succeed. What’s more is that in total, you only have to study and plan for eight hours every week! Curious about how that works? Let me break it down for you.

Early each morning, I give myself an hour to study and plan as needed. No matter how early the rest of my day starts, I always start with this hour – no exceptions. I devote the first 30 minutes to studying. When I say “studying,” what that basically means is that I’m reading a book to grow one of my core skills. Don’t spend that first 30 minutes reading useless crap; only focus on books that will help you grow in some way.

If your response to that idea of studying was that you don’t have time to read, then I would say you’re lying. Bill Gates, Warren Buffett, Oprah Winfrey, Elon Musk and Jack Ma are all voracious readers. Do you think you’re busier than them? Yeah, thought not. They’re not the only ones either – the average multimillionaire reads at least two books a month. And guess what? I can get through that many books in a month by reading just 30 minutes a day.

I spend the remaining half of the first hour of my day planning. That means I review my MVPs (most valuable priorities) and walk through my day in my head. Thinking about how I might interact and empathize

with people helps me grow my emotional intelligence.

It’s also during my planning time that I identify my spotlight moments – the moments when I know my example is on display, where I need to maximize my excellence. Want to know a little secret? Being excellent isn’t about trying to be incredible at everything all the time – it’s about picking the right moments to maximize your effort and be disproportionately excellent.

So, altogether, if you do those two things for an hour each day, that’s seven hours. The eighth hour happens on Sunday afternoon, when I plan out my week. And that’s it. That’s how you get a massive edge over your peers in whatever you’re doing. Too few do it and stick with it, and that will make it all the easier for anyone who does stick with it to succeed.
